

DEVARSHI DESAI

Front End Developer

Chattenden, Kent | 07884430773 | devarshidesai2019@gmail.com | [LinkedIn](#) | [Portfolio](#)

Mobile-first Front End Developer with 6 years of experience delivering pixel-perfect web experiences for global brands including, Clarks and Nespresso. Skilled in JavaScript, CSS3/SCSS, HTML5, and React, with strong experience in component-driven development, accessibility, API integration, and Agile delivery, working across the full development lifecycle from Figma wireframe to deployment.

WORK EXPERIENCE

Front End Developer (Webmaster), Nestlé Nespresso SA

08/2024 - Present

- Leading accessibility compliance across UK and IE B2B/B2C ecommerce platforms, conducting WCAG 2.2 AA audits using axe DevTools, WAVE, Lighthouse, and manual keyboard accessibility testing. Identifying and remediating issues through semantic HTML, ARIA implementation, focus management, and accessible component development. Working closely with UX, content, and marketing teams to communicate accessibility findings, agree remediation approaches, and embed improvements across campaign, product, and landing page templates.
- Maintaining the Nespresso UK and IE mobile apps (iOS and Android) by publishing and updating content, including banners and promotional assets through SAP Hybris, ensuring consistency between web and app customer experiences.
- Converting 15+ Figma wireframes into mobile-first responsive landing pages and merchandising templates for high-profile campaigns, collaborating with UX, Ops, and Brand teams throughout, using semantic HTML, CSS, and JavaScript from design handoff to deployment.
- Engineering custom front-end solutions beyond the existing platform's capabilities, building and integrating JavaScript components via API endpoints, including dynamically injected components on product pages, to deliver enhanced customer-facing experiences.
- Building and maintaining reusable UI components within the Emergya design system using Storybook and Webpack, ensuring scalable, consistent front-end architecture across the UK and IE websites.
- Implementing personalised content experiences using the Casper API, writing JavaScript logic to conditionally render content based on UTM parameters, user authentication state, and audience selection IDs, enabling targeted content delivery across the UK and IE websites.
- Managing 100+ product SKUs across the SAP Hybris ecommerce platform, maintaining product content, SEO metadata, and accessibility standards on product page templates, ensuring accurate listings, search visibility, and a consistent front-end experience across the catalogue.
- Utilising Git and Bitbucket to maintain, version, and develop production code, managing commits to ensure code integrity and streamline collaborative development workflows.
- Demonstrated strong agile working practices by managing personal sprint tasks, maintaining JIRA workflows, and proactively flagging blockers with coordinated solutions ahead of impact, achieving 95% on-time delivery whilst mentoring and supporting junior and new team members.

Front End Developer, C. & J. Clark International Ltd

11/2022 – 07/2024

- Delivered front-end solutions for 20 global markets, ensuring consistent user experiences and

improved accessibility and performance through best coding practices.

- Converted 12 Figma wireframes into high-quality, mobile-first, responsive landing and campaign pages with semantic HTML, achieving 100% design fidelity and SEO optimisation.
- Collaborated with 5 UI and brand designers to produce over 60 promotional assets, including sale, skinny, and hero banners, ensuring brand consistency across campaigns.
- Developed 30+ Handlebars.js components to enhance regional content delivery, improving website usability and consistency across multiple markets.
- Supported the global expansion project by migrating 400+ pages across regions during a re-platforming initiative, leveraging headless CMS platforms such as SAP Hybris and Ampliance.

Web Developer, Leigh Academies Trust

09/2021 – 10/2022

- Delivered 4+ responsive WordPress sites from wireframes using PHP, Custom Post Types, and Advanced Custom Fields, meeting complex client requirements across the Trust's digital portfolio.
- Partnered with the executive team to significantly improve the Leigh Academies Trust website, achieving a 64% increase in accessibility and 77% increase in mobile traffic within 3 months.
- Delivered accessibility training and best-practice workshops to 20+ colleagues, improving organisational awareness of WCAG principles and inclusive web design.
- Led a team of 3, delegating tasks and mentoring junior colleagues to improve team productivity and delivery.

Junior Web Developer, Leigh Academies Trust

09/2019 – 09/2021

- Provided daily technical support and troubleshooting for over 50 clients across the Trust, handling website updates and resolving issues.
- Contributed to the successful delivery of 29 critical projects by actively participating in the software development life cycle.
- Managed SEO across 31 WordPress sites using Yoast SEO, Google Analytics, and Hotjar - monitoring performance, identifying improvements, and maintaining search visibility across the Trust's web portfolio.
